

VeraCare

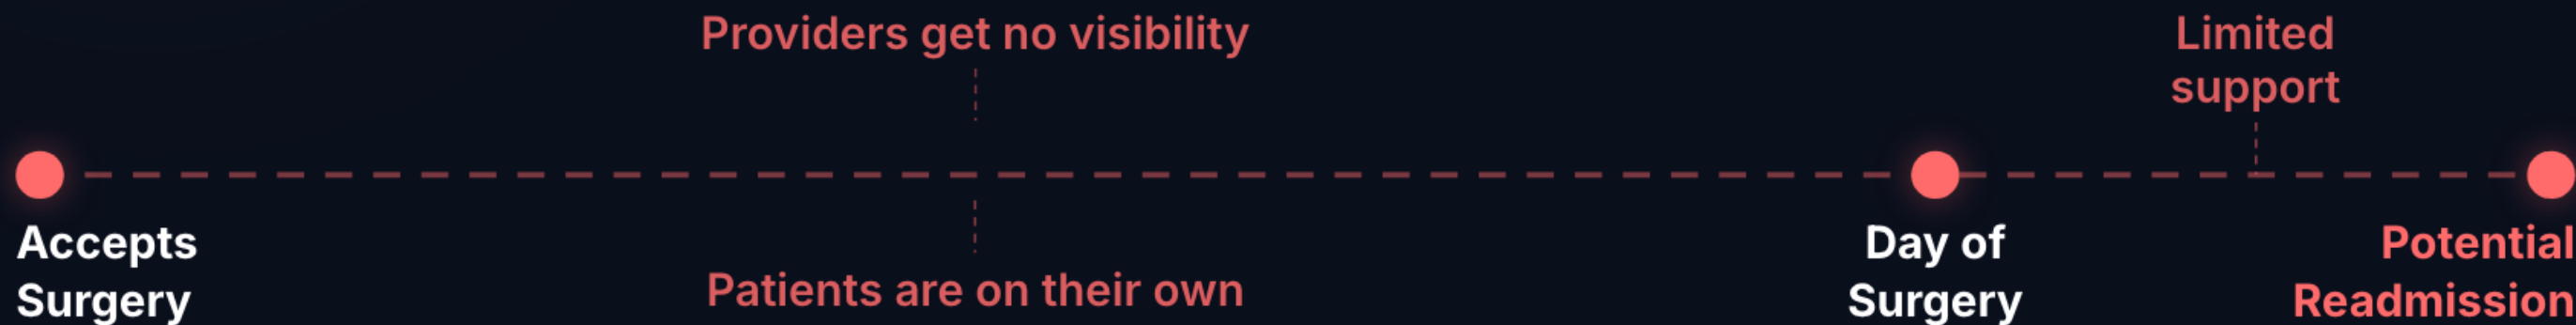

THE FUTURE OF PERIOPERATIVE CARE

OUR ORIGIN

A Preventable Crisis in the OR

Perioperative Process Today

The Perioperative Problem

Patient readiness + recovery is broken

67%

of patients find the informed consent process unsatisfactory and confusing.

PMCID: PMC3854804

80%

of medical information is forgotten immediately by patients.

PMCID: PMC539473

...and providers pay the price

1 in 5

readmissions are preventable, costing ~\$300M annually.

PMCID: PMC8044735

\$37/min

cost of OR time. Cancellations directly erode surgical revenue.

PMCID: PMC5875376

The Deeper Problem: Perioperative Care is Broken

The Black Box

Patient readiness + recovery is a black box.

Disconnected Workflows

Disconnected + fragmented tools.

Reactive, Not Proactive

Providers are then subjected to be reactive, spend time chasing information, and reacting to avoidable situations.

THE SOLUTION

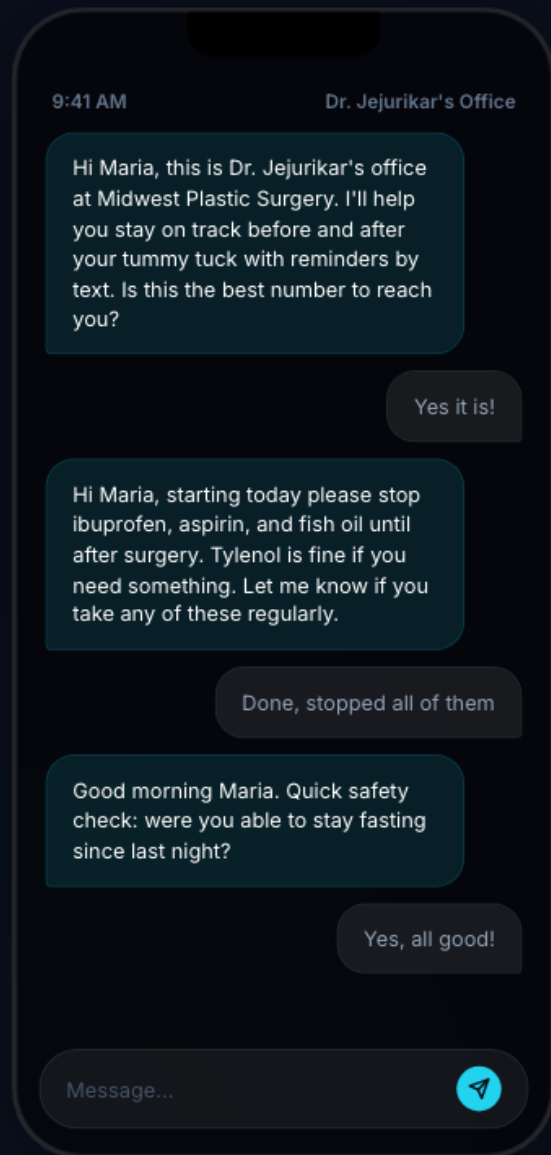

How VeraCare Changes the Procedural Flow

Every step delivered through phone and SMS — no app, no portal

VeraCare meets patients where they are

No app to download, no portal to log into — just a helpful text thread in your practice's voice

Adaptive Readiness + Recovery Tracking

Real-time visibility into patient preparation and recovery milestones.

Adaptive Communication / Outreach

Outreach that adapts to patient engagement and escalates when needed.

Adaptive Scheduling Support

Readiness data drives smarter scheduling and fewer cancellations.

Competitive Landscape

VeraCare bridges perioperative operations with real-world patient behavior outside the hospital.

Quantified patient readiness and recovery creates real operational, clinical, and legal value

Better Outcomes

Proactive support throughout the perioperative journey drives **better patient outcomes**.

Reduced Delays & Cancellations

Catches readiness issues earlier, reducing same-day cancellations and underutilized **OR time**.

Reduced Readmission Risk

Recovery tracking gives visibility into patient progress.

Liability & Claims Support

Evidenced records of what the patient was **told, shown, completed**, and what outreach occurred. Supports claims appeals.

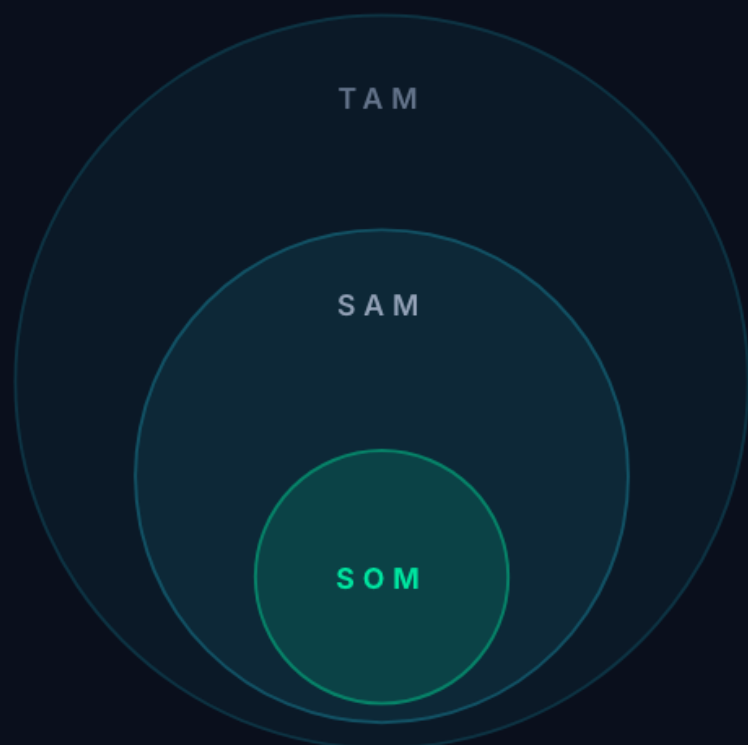

Proprietary Data Moat

The moat is **operational intelligence** from continuous visibility into the patient journey — powering all adaptive systems.

A Multi-Billion Dollar Perioperative Administration Market

Defensible growth across U.S. surgical operations and perioperative management

TAM

\$17.6B

Annual administrative pain across U.S. perioperative sites — driven by preventable readmissions, cancellations, and first-case delays across community hospitals and ASCs.

SAM

\$3.59B

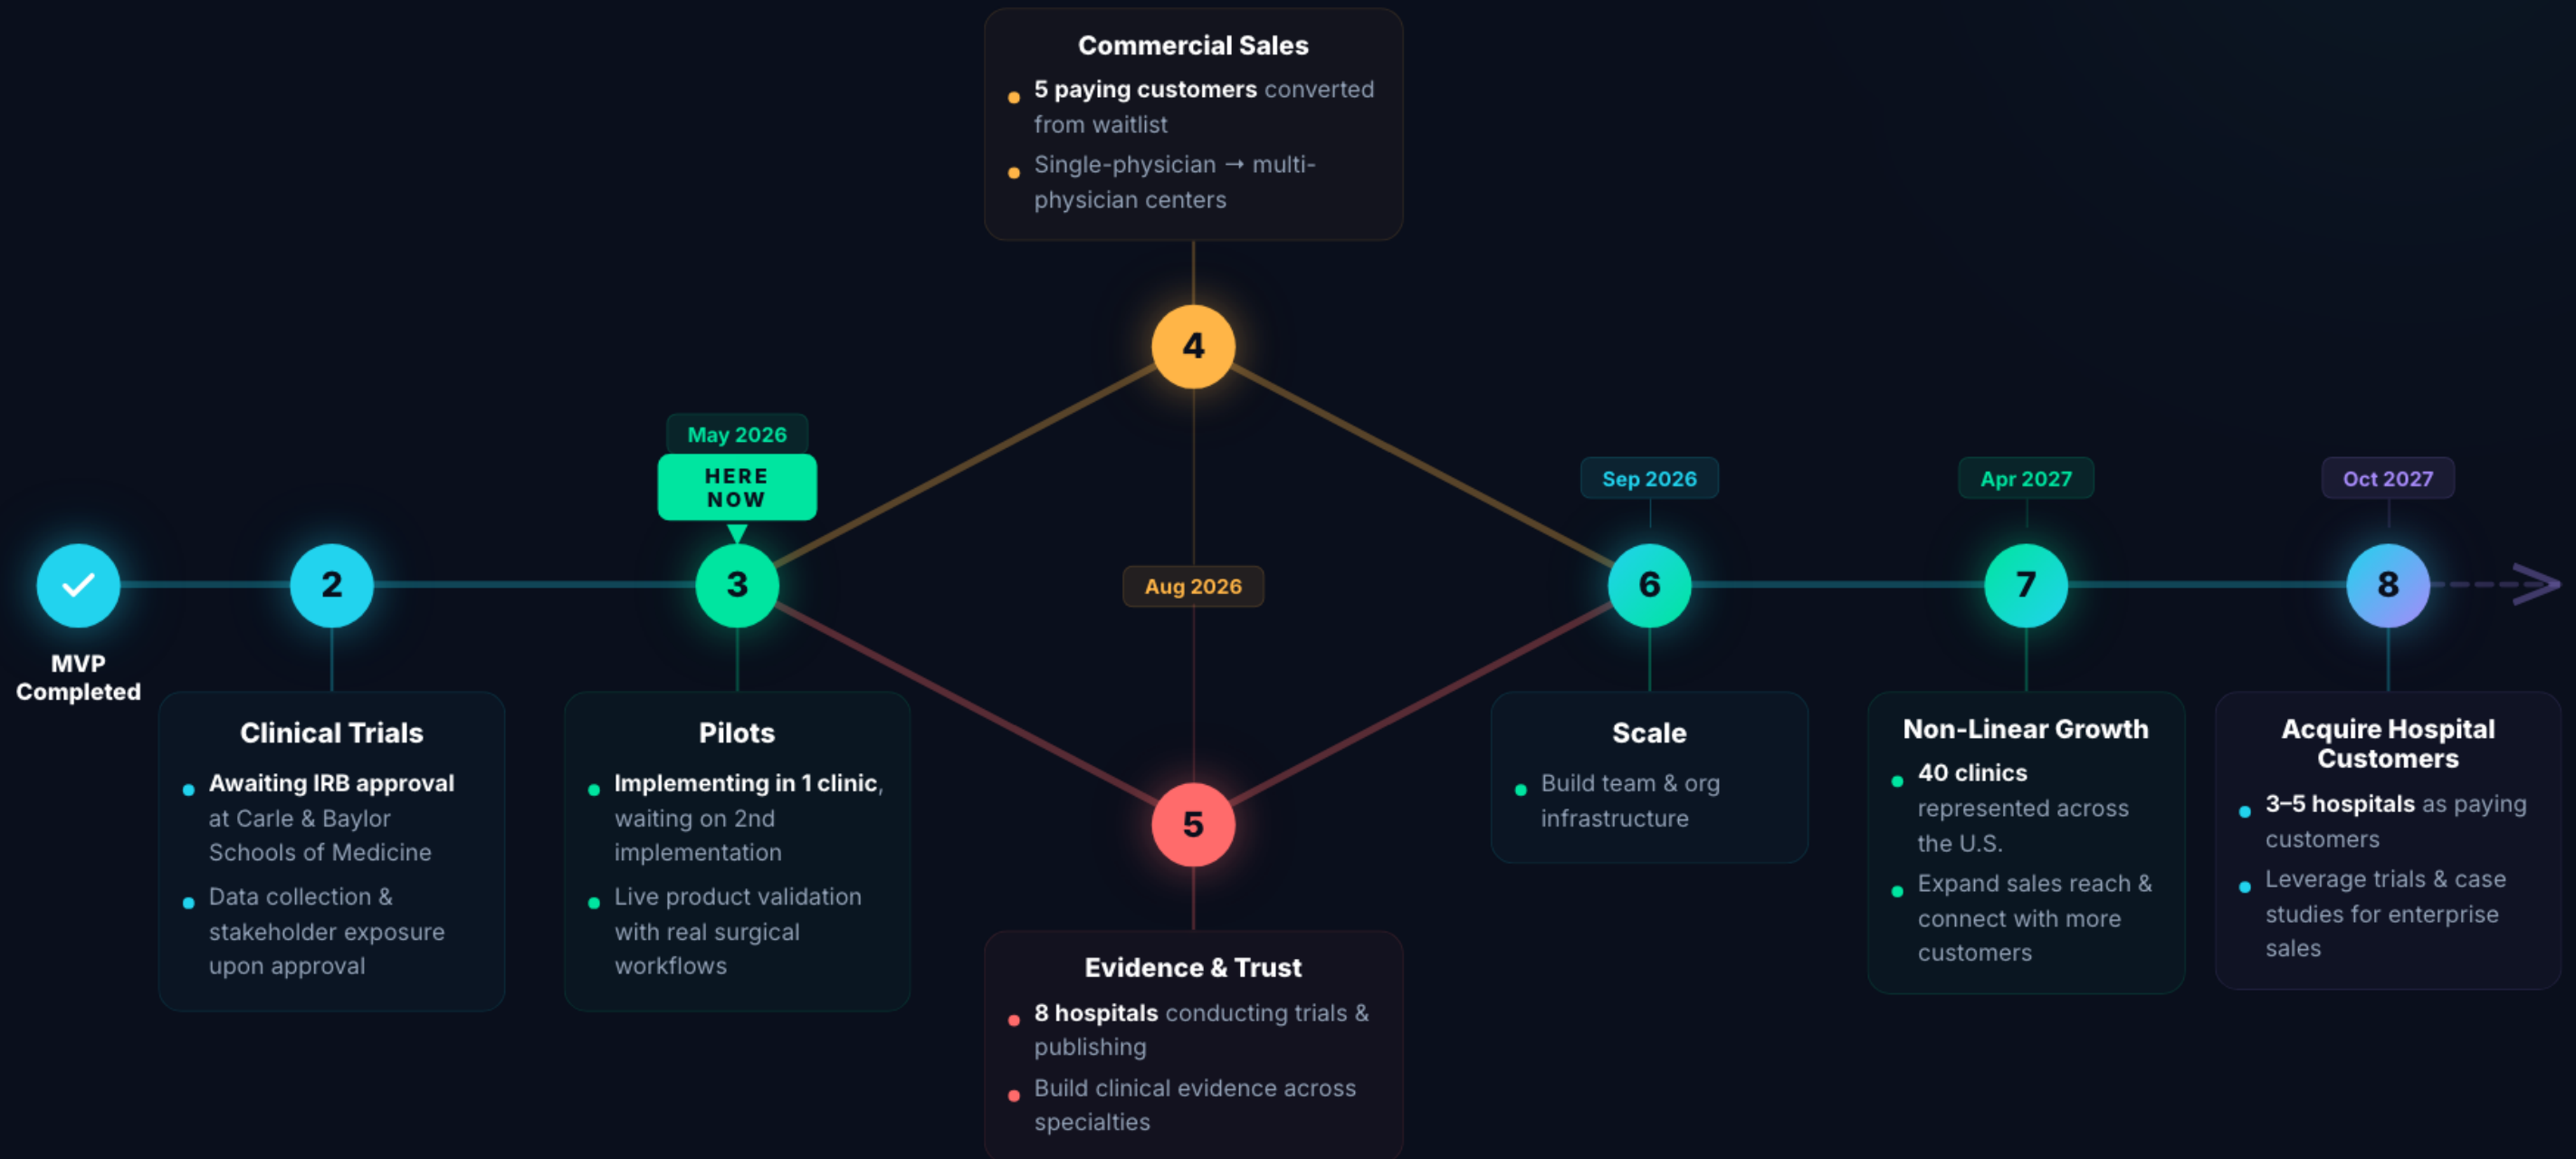

Core U.S. software opportunity across 6,436 ASCs and 5,121 community hospitals, assuming future-state contract values of \$200K per ASC and \$450K per hospital.

SOM

\$95M–\$212.5M ARR

Attainable near-to-mid-term revenue: 250–500 ASCs and 100–250 hospitals.

Go-To-Market: 18-Month Path to Full Operations

Commercial Model & Pricing Framework

Meaningful platform contracts with included episode volume; usage and add-ons expand revenue as workflow depth and scale increase

\$

Contract Structure

	CLINIC	ASC / MULTI	HOSPITAL	ENTERPRISE
Implementation Workflow design, setup, training, launch	\$5k–\$15k	\$15k–\$40k	\$40k–\$150k	\$100k–\$300k+
Platform License ARR Engine, dashboard, audit, reporting, support	\$25k–\$45k	\$50k–\$100k	\$150k–\$300k	\$400k–\$1M+
Included Volume Baseline episodes in annual contract	~1,000	~3,000	~8,000	Negotiated pool
Overage / Deeper Workflow Above included volume or intensive tiers	~\$4–\$8 / ep	~\$4–\$8 / ep	~\$3–\$7 / ep	~\$2.50–\$6 / ep
Add-ons	Translation, integrations / SSO / API, analytics, governance, premium support			+\$10k–\$250k+ ARR

Unit Economics

Variable Delivery Cost

\$0.50–\$2.50

/ episode

GROSS MARGIN

Disclaimer

VeraCare is early stage. Pricing, contract design, and reimbursement strategy will evolve as we work with pilot clinics, collect deployment data, and run clinical studies.

Who We Serve

Built for high-throughput procedure settings

Surgical Facilities

- Ambulatory Surgery Centers (ASCs)
- Hospital Operating Rooms (ORs)
- Same-day Surgery Units
- Specialty Surgical Hospitals

Interventional & Lab Suites

- Cath Labs & EP Labs
- Interventional Radiology
- Vascular & Endovascular
- Bronchoscopy Suites

Specialty Outpatient Centers

- GI/Endoscopy & Ophthalmology
- Ortho/Spine & Pain Management
- Urology, ENT, & OB/GYN
- Plastics & Mohs Surgery

Procedural Networks & Operators

- Multi-site ASC Operators
- Specialty Management (MSOs)
- Large Specialty Groups
- Multi-site Procedure Centers

Early Validation & Market Pull

Customer demand is forming ahead of launch — we're not pushing product, clinics are pulling us in

30

CLINIC CONVERSATIONS

Deep discovery across clinical and administrative stakeholders

2

PILOTS LAUNCHING

Implementing in 1 clinic now, 2nd implementation in progress

2

UNIVERSITY STUDIES

Running studies at large university health systems — collecting clinical data

MULTI-STAKEHOLDER ENGAGEMENT ACROSS THE CARE ECOSYSTEM

Physicians

Clinical workflow validation

Nurses

Care coordination needs

Administrators

Operational & ROI alignment

Receptionists

Front-desk workflow pain points

WHO WE ARE

The Team

Abhinav

CO-FOUNDER

Molecular Biology + Computer Science @ UIUC

- ML research/engineering & app dev @ Ramona Optics + Feinberg SOM
- ML with genomics datasets @ Feinberg SOM
- Experience building ML models, big data analysis apps, and clinical workflows
- Clinical experience & surgery intern @ TMC/Baylor

Netsh

CO-FOUNDER

Data Science + Finance @ UIUC

- Healthcare Private Equity @ Infinitive Capital
- Data Science Intern @ BMO Financial Group
- Operational knowledge combined with business background
- Extensive AI engineering and implementation experience

Ramiro Fernandez II, MD

PRINCIPAL CLINICAL ADVISOR

Baylor · Northwestern · Cleveland Clinic

- Leading thoracic surgeon & lung transplant specialist with deep perioperative care expertise
- Fellowship-trained across three of the nation's top academic medical centers
- Bridges clinical excellence, research leadership, and surgical innovation to guide VeraCare's vision

Advisor Network

A credible clinical support network spanning training levels and care settings

MEDICAL STUDENT COLLABORATORS

Kaviamuthan Kanakaraju

Carle Illinois College of Medicine

Engineering-integrated medical training with deep exposure to health-tech innovation

Senthooran Kalidoss

UChicago Pritzker School of Medicine

Clinical perspective from one of the nation's top research-driven medical schools

DOCTOR ADVISORS

Dr. Mallika Rajendran, MD

Obstetrics & Gynecology

Advice on hospital systems, large hospital operations & procedures

Dr. Nhila Jagadeesan, MD

Internist · Physician Advisor

Internal medicine perspective on care coordination & patient management

Jayakrishna Chintanaboina, MD, MPH, FASGE

Interventional Gastroenterologist

Advice on private clinic operations & procedural workflows

Aishwarya Reddy

Northwestern · PGY-1 Resident

Frontline perspective on perioperative workflows, patient handoffs & care coordination

● 2 Medical Students

● 4 Doctor Advisors

Spanning hospitals, private clinics, & academic medicine
